

They are the villains in any western movie... some literally had black "bad guy" hats on. They came to our community to spread fear and hate, they came to fan the flames of Portland.

A gang of Proud Boys road into town, who had guns both open and concealed carrying, shot off paint balls and Pepper Sprayed protesters.

They are openly waving confederate flags mixed with Trump 2020 and blue lives with no condemnation.

Trump is calling them "Patriots" as they literally fly the flag of racist, traitors that tried to destroy the Union... hand & hand with his name. Sending over 100+ Tweets blaming others for the climate he built.

At some point Police will have to pick between protecting all American people, not just the ones spreading hate while boosting their ego as seen in Kenosha.

Trumps and his base are paralleling: Confederacy ideology and tactics Racist Counter Protesters in the 60's Steps towards Fascist Government

If we take a deep honest look of racism in these country and the events that lead us here (from all perspectives, not the revisionist history you learned in High School) we can see obvious continuation of racist systems and counter protests.

Drawing those parallels we are headed down to a dark place as a country.

This week has been hectic from the tragic events building on top of open wounds to the blatant indifference to racism in the U.S. (not new to this week, but we have two obvious examples and the reactions that followed)

A President that is fueling the flames, and openly is promoting & antagonizing violence.

I keep thinking this is an open book test... but apparently some people are still reading the old text books.

I am honestly scared right now.

We should not normalize people dying at protests. We should not normalize Proud Boys riding in like cowboys to other cities with the intension to incite a confrontation based on racism.

The government has failed us, don't let the people.

As a reminder, Antifa is an adjective not a group. We should all be Anti-Fascists with what is going on in our country.

BLACK LIVES MATTER

First of all...

This Week
